

## Press Release

Welcome To ShenZhen X-Mulong Circuit Co., Ltd.

X-Mulong Circuit is a professional PCB manufacturer which established in 2005. Adhere to be a specialized manufacturer for multiply species, small to medium series, and quick turn production, we insist to provide 3H(high quality, high precision and high density) PCBs for our customers. With a total plant area 30,000sq.m, our monthly capability can be 60,000sq.m with 3000 parts. Our factories located in the modern Industrial Park of Shenzhen City. With advanced PCB production and testing equipments, and well-found quality system to monitor throughout the whole manufacturing process, we can ensure the stable and excellent quality of the production process to meet customers' requirements.

In June 2015, X-Mulong Circuit succeeded in the buyout of Shenzhen Victory Electronic Technology Co., Ltd.

With high speed development, continuous improvement and persistent concentration in PCBs production during the decades of years, we can manufacture 1-16L layer rigid PCBs, Flex PCBs, High Frequency PCBs, HDI PCBs and Metal Base Aluminium PCBs. 80% of our products are exported abroad. Main application fields of our products are Industry Control, Automation, Automotive Electronics, Communication Device, Security Electronics, Smart Home Appliances and so on. We are certified to ISO 9001-2015, ISO14004-2004, ISO/TS16949-2009 and UL certification.

The concept of X-Mulong is "quality and credit comes first, continuous improvement, customers' satisfaction." .

We will continue to focus on customers' demand and our goal is to make X-Mulong as one of the competitive and reliable PCB suppliers from the worldwide. X-Mulong will keep on making the most competitive PCB product platform, to achieve our win-win business and create a prosperous future with you!
