

# Welcome to Tecoo Electronics

-Devoted to Advanced Technology -Inovate Quality Life

### About us

Tecoo, a global electronics manufacture service provider, was established in 2002, with more than 16 years experience.

Focus on international advance technology, provide customer-oriented design, engineering, manufacturering, assembly service. Intergrating global long term cooperated, best quality procurement sources, provide the competitive "total cost" project cooperations.

#### We have:

- 10+ years' design experience for automotive electronics and home appliance.
- Powerful design team, considering all phases of development and production to create the highest functionality and efficiency.
- Reliable testing solutions and advanced equipment.

### **R&D** Capabilities

Tecoo integrates imagination with discipline, expertise, and efficiency. Our R&D team consists of experienced engineers specializing in industrial design, mechanical design, circuit design and software development.

•Flexible & high speed , High precision and stability, World- class equipment SMT (YAMAHA, QKQ)

•JINGTUO best selling reflow oven- high class Nitrogen style( as required by our Germany and Japan customers)

### Manufacturing Capabilities I

We introduce the latest advanced manufacturing techniques. We know how to control technique details in each process to attain a high quality product which you expect. We are flexible from extensive PCB assembly to complex box-build/system assembly.

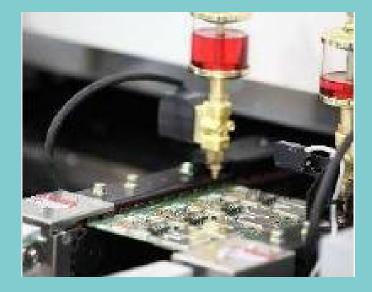

### Manufacturing Capabilities II

Serivce Includes:

- SURFACE MOUNT TECHNOLOGY (SMT)
- THROUGH-HOLE TECHNOLOGY
- ELECTRONIC-MECHANICAL ASSEMBLY
- MECHANICAL ASSEMBLY AND BOX BUILD
- TESTING
- COATING
- LABLING
- PACKAGING

#### Test

Total PCBA test solution covering all the process starting from material incoming, manufacturing, to shipping, including DFM, DFT, FMEA, Failure Analysis and Reliability Testing Custom test solutions based on customers' requirements

### **Advanced Equipment**

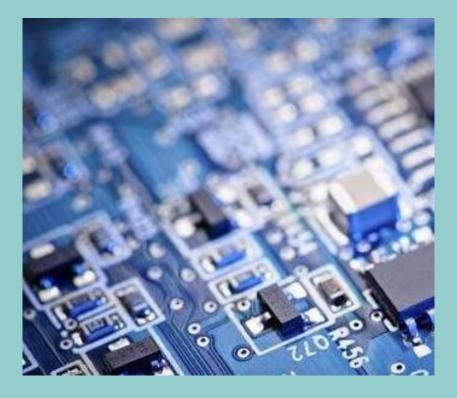

**TECOO** 

Electronic Manufacture

#### Serivce Includes:

- GLOBAL SOURCING AND PROCUREMENT
- SUPPLIER SURVEY & MANAGEMENT
- LOCALIZATION & COST OPTIMIZATION
- ROLLING FORECAST AND ORDER
- LONG LEAD-TIME MATERIAL MANAGEMENT
- ERP SYSTEM
- INVENTORY MANAGEMENT
- DAILY SHORTAGE MATERIAL CHECKING
- ON TIME DELIVERY
- LOGISTICS & AFTERMARKET SERVICES

### **Supply Chain Management**

For each product manufacture cycle, Tecoo supply chain team provide an end to end supplier chain solution to meet customer request. From material management, Tecoo help customer to gain and maintain a costeffective competitive supply chain, shorten product material lead time, and lowdown the inventory stock.

#### Serivce Includes:

IQC, all incoming components 100% IQC inspection.
In SMT workshop, IPQC every one hour, 100% AOI by machine and 100% manual QC.

•In DIP workshop, 100% QC before and after waving soldering.

•100% function testing.

For products with enclosure, we do 100% appearance inspection and function testing again after assembled.Before delivery, OQC by AQL standard MIL-STD-105E.

### **Quality Control**

Through innovation and application of advance technologies ,together with our highly integrated teamwork ,we continuously review and improve our quality performance to exceed customer expectations.

ISO: 9001:2008 certified and strictly apply its quality management system.

Only the products' Functional yield  $\ge$  99.75% and Main defect yield  $\ge$  99.6%, then we delivery the goods.

### **Tecoo have rich experience in below areas**

Industrial

Automotive

Medical

#### Home Appliance

Consumer

Green / Eco

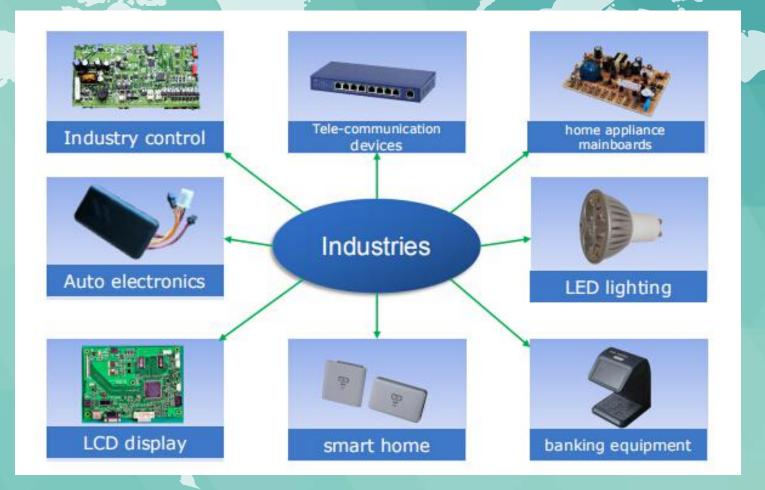

Wearables

Conmmunication

## Tecoo have completed more than 450 projects for more than 180 customers over the world...

### **Tecoo Cooperated Partners**

### **Tecoo's Management Philosophy**

Tecoo management team strive to let employees to self realize in Tecoo, dedicate to society. Our people are our most valuable asset. Tecoo is a reliable and trustworthy manufacturing partner. We are pride of ourselves on meeting our customers' needs, whether that means deploying new engineering processes or creating new products.
