SkyBOX Checkout Revolutionizes International eCommerce Payment and Logistics

New International Checkout Platform Provides Real Time Total Landed/Delivered Cost Calculation on Product-by-Product Basis

SkyBOX, Inc. announced today that they have launched SkyBOX Checkout, a new state-of-the-art payment and logistics platform that revolutionizes the Internet shopping experience for international shoppers and etailers around the world. SkyBOX Checkout is the most robust international checkout platform that provides the total landed cost in real time and on a product-by-product basis. It also provides this information in any of the more than 140 supported local currencies.

SkyBOX Checkout also provides all fraud screening, shipping, customs clearance, FOREX protection and multilingual customer service for all international orders.

"Customers no longer have to wait until the checkout process to know the total delivered cost of their purchase. With SkyBOX Checkout, customers simply hover over a product and a pop-up immediately illustrates ALL of the costs to deliver that product to their home and in their local currency. The total landed cost is provided in real time and on a product-by-product basis," said SkyBOX VP of Technology Emilio Lizarraga.
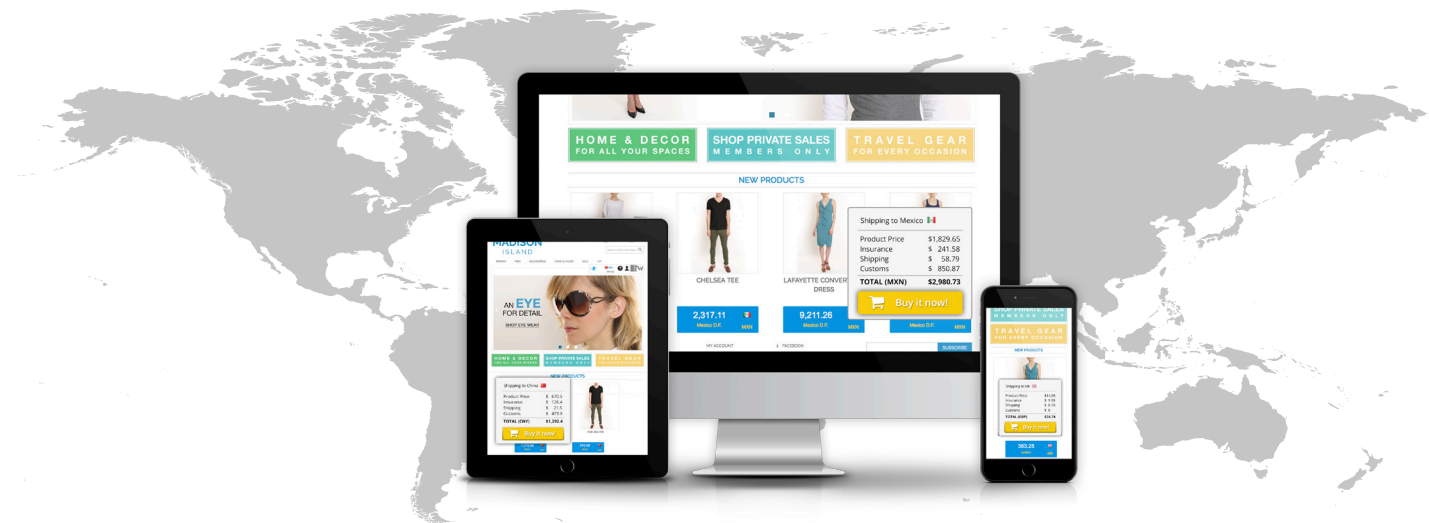

"The retail industry can now deliver a complete, end-to-end, fully guaranteed DDP cross-border shipping service, anywhere to anywhere around the world. There is no other international checkout platform that can match that."

Paul V. Gartlan
President & CEO
SkyBOX Checkout

"We are also experts in cross-border customs documentation and with our guaranteed calculation of all duties, taxes and heavily discounted shipping fees there are no surprises. The retail industry can now deliver a complete, end-to-end, fully guaranteed DDP cross-border shipping service, anywhere to anywhere around the world. There is no other international checkout platform that can match that." Added SkyBOX chief executive officer Paul V. Gartlan.

There is no set-up cost, monthly fee, or long-term commitment for etailers. SkyBOX Checkout coordinates all harmonized codes and dimensional weight set-up from the etailer's existing product database ensuring that shipping, duties and taxes are calculated correctly.

SkyBOX Checkout enables etailers anywhere in the world to accept orders from customers outside of their domestic market. SkyBOX Checkout's robust Rest Web Service API and Amazon hosted platform scales on demand to satisfy heavy seasonal spikes for etailers. Plug-ins for many popular eCommerce platforms like Magento and Open Cart are ready to use. The company's team of expert developers is also skilled at adapting the solution to serve custom or in house eCommerce platforms.

SkyBOX Checkout is the culmination of over twenty-five years of industry knowledge and expertise in international logistics. The first SkyBOX product, a freight forwarding U.S. address solution, was created in 1991 connecting international consumers with purchases from their favorite U.S. brands. SkyBOX Checkout alleviates all of the traditional risks and costs associated with international eCommerce allowing the etailer to seamlessly accept orders from their global customers. Both SkyBOX and SkyBOX Checkout utilize their own proprietary logistics network Skynet Worldwide Courier. Skynet Worldwide Courier has been delivering packages to more than 180 countries since 1972 and is the 6th largest courier network in the world.

SkyBOX will debut SkyBOX Checkout at the Internet Retailer Conference & Exhibition (IRCE Booth #261), the world's largest eCommerce event, on June 7-10 in Chicago.

About SkyBOX Checkout:

SkyBOX Checkout is an international eCommerce solution for etailers anywhere in the world to enter the lucrative 1.5 trillion-dollar global eCommerce market in more than 200 countries and territories. SkyBOX Checkout provides a full landed cost solution visible on all areas of the checkout process from the home page to the cart page. SkyBOX Checkout takes on full risk of fraud screening and international payments while providing competitive international shipping with full tracking via its proprietary logistics network.
Anywhere-to-anywhere eCommerce,
SkyBOX Checkout takes you global!
