## **Cloud** Designed by Wolfgang C.R. Mezger

Cloud combines luxurious comfort and an elegant aesthetic to create a chair that instantly and effortlessly enhances the working environment. Immeasurable comfort is the trademark of this breathtaking office chair. The seat and back pad are a blend of down, feather and polyester fiber cushions, implementing a new level of comfort to the modern office. Available in mid and high back, this fully upholstered conference chair makes the workplace more inviting than ever with a new take on a classic piece. With a statuesque form and dignified style, Cloud makes no small statement in any environment.

Cloud offers workplace-seating comfort like you have never felt before in an elegant, beautiful form. Cloud offers supreme comfort all the time. In addition to the comfort of the one-piece seat and back shell, the classic knee-tilt seating mechanism offers unprecedented support. The shape of the bent plywood seat shell cradles the users' form and gives the impression that you are sitting into the chair. Cloud adds depth and dimension to conference rooms and executive office spaces alike.

Cloud is defined by a coexistence of seemingly opposing ideas. Cloud is unbelievably soft yet impossibly strong, bold yet understated, subtle yet powerful. This ethereal executive chair demands your attention with beautiful form and unparalleled comfort. The upholstery detailing makes Cloud even more inviting, with a slight ruching detail offering visual interest.

Reinforced copolymer casters have a brake feature that prevents the chair from rolling away without weight in the chair. This safety feature keeps the chairs from slipping out from under users. Immeasurable comfort is the trademark of this breathtaking office chair. Implementing a new level of comfort to the modern office, Cloud offers a unique seating experience unto itself.
