

Okamura Enhances Multi-Purpose Seating with Perlutz

Short-term seating is increasingly the norm in corporate settings; Perlutz meets this demand with simplicity, stackability, and style.

CHICAGO—Leading Japanese office furniture manufacturer Okamura will debut the Perlutz chair at this year's NeoCon. Designed by Martin Ballendat, Perlutz has already been honored with a Good Design Award and an iF Design Award.

Perlutz combines simple design with structural engineering, enabling it to be lightweight yet strong, with a curvilinear shell that supports good posture. Stackable up to four chairs, Perlutz is ideal for seating in reception, cafeteria, seminar and meeting areas.

The body of the chair tapers at the edges, giving the illusion of a nearly paper-thin silhouette. Narrow twists on either side of the frame provide strong support with comfortable flex and give the chair a pronounced, yet minimal appearance. The bright colors and distinct curvature of the body invoke a stylishly casual environment.

The chair is available either with a glass fiber reinforced nylon shell, available in five colors, or an upholstered seat, available in four colors. The frame is chrome-plated steel pipe, and comes with or without arms.

Perlutz is Greenguard certified as aiding in the creation of healthier indoor environments.

About Okamura Corporation
