

Okamura Launches “5° GO-DO” Three-Dimensional Acoustic Wall Paneling

A collection of high performance acoustic wall paneling doubles as a subtle design accent in corporate environments.

CHICAGO—At NeoCon 2016, leading Japanese office furniture manufacturer Okamura will launch 5° GO-DO, a beautiful collection of high-performance felt acoustic wall paneling.

The collection of panels derives its name from its subtle, yet exquisite 5° geometric extrusions—in flat, x-shape, quarter-circle and triangles variations. Created by a non-woven, felt polyester surface, the contours of the shapes are definitive yet seamless. GO-DO panels may be arranged to create a variety of patterns, from classic linear to gentle curvilinear shapes.

The felt exterior and internal wadding of 5° GO-DO panels are engineered to effectively absorb most voices, including speech frequencies that range from approximately 500 to 2000 Hz. GO-DO has high-performance NRC and SAA values of 0.75 and 0.76 respectively. The magnetic backing easily attaches to steel surfaces, including partitions, for no-construction installation.

As a neutral wall accent GO-DO comes in three shades of gray. The sophisticated design and noteworthy performance are meant to compliment the trend of increasingly open offices, which may require more acoustic management.

GO-DO is Greenguard certified as aiding in the creation of healthier indoor environments.

About Okamura Corporation

For over 70 years, Okamura has been Japan’s leading office furniture manufacturer and a benchmark for the industry. Okamura is recognized for its high quality products that have achieved design and engineering excellence. Okamura products are now distributed to over 50 countries.
