New Product Introductions 2016

*Hear yourself think™*

*ecooustic® Veneer combines sophisticated wood panel finishes with sound diffusion and sound absorption capabilities. ecooustic® Veneer is available in perforated and non-perforated panels, 11" x 106" (0.3m x 2.7m), which interlock via a shiplap system to permit easy installation to interior walls and ceilings. NRC to .80.*

*ScreenTrak™ is a collection of screens available in either a soft version, the Soprano Collection, or a rigid version, the Bass Collection. Available in a wide range of colors and patterns, ScreenTrak™ is designed for active sound diffusion and absorption and space definition. Each screen type is available with multiple track hanging options using Unika Vaev's proprietary track system.*

*Unika Vaev's new ecoustic® e3 self-sticking hexagon tiles tease your tessellation temptations. Each polyester hexagon tile is sectioned into three parallelograms that are .53" thick and which may be applied on almost any wall substrate (NRC - .50). ecoustic® e3 kits of five hexagon tiles are available in a choice of 16 color-ways to provide an endless array of design solutions. Let M.C. Escher be your guide!*

*The ecoustic® Velour Panel and Screen collection consists of four different thicknesses of PET acoustic cores to which a velour faced polyester fabric has been adhered. This product line, which is available in 11 color-ways, greatly expands the type of face finishes available in the acoustic products market. With NRC ratings of .30 to .95, this hook and loop receptive product also eliminates the need for pushpins and other mechanical presentation fasteners.*

*Felt is a completely homogeneous material that can be cut in any way without fraying. Precise cutting of felt provides clean edge detail thereby permitting designers to play with form. Design your own rug pattern or start from Fraster's standard patterns and then select from 31 colors to find the felt rug that perfectly suits your interior design. Company logos can be embedded in the carpet and edge stitching assures dimensional stability. Slip free EVA backing is applied to secure safe installation.*

## Unika Vaev's Acoustical Product Intro's at NeoCon World's Trade Fair 2016

CHICAGO, IL June, 2016 – New Unika Vaev product introductions to be unveiled at the NeoCon World's Trade Fair 2016

Our latest additions to Unika Vaev's extensive collection of acoustic sound diffusing and absorbing solutions follow:

**ecoustic® Veneer** – ecoustic® Veneer combines sophisticated wood panel finishes with sound diffusion and sound absorption capabilities. ecoustic® Veneer is available in perforated and non-perforated panels, 11" x 106" (0.3m x 2.7m), which interlock via a shiplap system to permit easy installation to interior walls and ceilings. NRC to .80.

**ScreenTrak™** – ScreenTrak™ is a collection of screens available in either a soft version, the Soprano Collection, or a rigid version, the Bass Collection. Available in a wide range of colors and patterns, ScreenTrak™ is designed for active sound diffusion and absorption and space definition. Each screen type is available with multiple track hanging options using Unika Vaev's proprietary track system.

**ecoustic® e3 Tiles** – Unika Vaev's new ecoustic® e3 self-sticking hexagon tiles tease your tessellation temptations. Each polyester hexagon tile is sectioned into three parallelograms that are .53" thick and which may be applied on almost any wall substrate (NRC - .50). ecoustic® e3 kits of five hexagon tiles are available in a choice of 16 color-ways to provide an endless array of design solutions. Let M.C. Escher be your guide!

**ecoustic® Velour** – The ecoustic® Velour Panel and Screen collection consists of four different thicknesses of PET acoustic cores to which a velour faced polyester fabric has been adhered. This product line, which is available in 11 color-ways, greatly expands the type of face finishes available in the acoustic products market. With NRC ratings of .30 to .95, this hook and loop receptive product also eliminates the need for pushpins and other mechanical presentation fasteners.

**Fraster Rugs** – Felt is a completely homogeneous material that can be cut in any way without fraying. Precise cutting of felt provides clean edge detail thereby permitting designers to play with form. Design your own rug pattern or start from Fraster's standard patterns and then select from 31 colors to find the felt rug that perfectly suits your interior design. Company logos can be embedded in the carpet and edge stitching assures dimensional stability. Slip free EVA backing is applied to secure safe installation.

**These designs can be viewed in the ICF Group's Showroom on the 3<sup>rd</sup> floor, showroom 365, at the NeoCon Show!**
