## **New Enhancements to 2020 Office Solutions Streamline the Sales Process**

**Westwood, MA, and Laval, QC, May 24, 2015 – 2020**, the world's leading provider of applications and enterprise solutions dedicated to interior design, space planning and furniture manufacturing, today announced the release of their 2016 version of 2020 Cap, 2020 Giza, 2020 Worksheet, and 2020 Visual Impression in time for NeoCon 2016.

New features in the 2016 release continue to build on the strong existing core of features to further simplify the dealer sales process. Based on AutoCAD®, 2020 Cap is the perfect professional space planning and specification solution for designing faster with fewer errors thanks to the automation of time-consuming tasks and the most up-to-date catalogs in the industry. As part of this release, 2020 Cap has been updated to support the industry standard AutoCAD 2017. As a result of feedback from customers, designers will now be able to communicate important information for project staging, delivery, and installation by organizing worksheets in color in 2020 Worksheet. Another addition is the ability to add building, floor, department and person tags to all 2020 Cap designs making it easier for designers to organize their projects.

“The requests for enhancements we receive from designers in the field are invaluable to us so we can provide enhancements to help streamline their daily tasks and communication between teams,” states Cindy Maple, Product Manager, Office Suite, 2020. “In addition to these enhancements, we also continue to ensure we add valuable manufacturer catalog content so designers can provide their clients’ realistic designs using the actual products, colors, and materials.”

2020 Giza is an easy-to-use sales, design and specification tool for the do-it-all furniture professional who doesn’t want or require the complexity of AutoCAD. 2020 Giza makes it easier to communicate and collaborate with the Architecture and Design Community as users can now seamlessly import AutoCAD drawings and rely on the software to translate all required information without user intervention.

To learn about these new features and more, visit 2020 at NeoCon in Chicago, June 13-15, in booth #7-4122. If you can't make it to Chicago, sign up for our live presentation that will showcase these features on June 2, 2016.

#### About 2020

2020 helps professional designers, retailers and manufacturers in the interior design and furniture industries capture ideas, inspire innovation and streamline processes. By providing end-to-end solutions and the world's largest collection of manufacturers' catalogs, 2020 provides businesses with the software and content to be more efficient, integrated and productive. 2020 applications allow professional designers to create kitchens, bathrooms, closets and commercial offices which look as stunning on the screen as they do in reality. 2020 helps retailers to inspire the imagination of their customers and provide an on-line design and shopping experience for home projects. Our solutions for furniture and cabinet manufacturers deliver a complete manufacturing operations management capability to run their factories at maximum efficiency.

Founded in 1987 and headquartered in Laval, Quebec, 2020 employs over 500 people, has direct operations in 11 countries, and supports customers in many more locations around the world through a network of value added resellers.
