

FOR IMMEDIATE RELEASE

Introducing Bakhita

Bakhita is an ultra-modern chair perfect for the home, office or outdoor multi-function space. Simple, clean and comfortable, Bakhita is designed to look good and perform well.

This is not an ordinary plastic chair. The 2K injection-process behind it makes it sturdy and durable. The technology is complex, the result is simple: a comfortable and high-quality lightweight stacking chair that fits in stylishly everywhere, from casual to formal, office to home, indoors and out. The unique two polymer injection processes consist of a technopolymner on the outside and high resistance polymer on the inside. Bakhita is also designed with an open back for ease of cleaning.

Spread Bakhita out across a patio or in a café, line them up in a dining hall or classroom. Bakhita makes it easy for people to pull up a chair and have a chat, lunch, or even a learning experience. Choose the chair with arms or without: both are available in 4 colors. This series is 100% recyclable and is scratch resistant, stain resistant, antistatic and UV resistant. Bakhita has been tested and meets ANSI-BIFMA standards. Global Warrants the Bakhita series under our Lifetime warranty and is rated for 300lbs.
