

## Manhattan

Reaching new heights!

FOR IMMEDIATE RELEASE

With modern design and its very compelling market positioning, Manhattan has been turning heads throughout North America for some time now. Backed by growing demand, Spec is premiering two new models at NeoCon 2016: a **Manhattan with Footring**, and an **Electric Height Adjustable Manhattan** table.

The **Manhattan with Footring** can be specified as freestanding or wall-adjacent, is standing height and available in a variety of shapes and sizes. This go-to meeting table is available with virtually unlimited laminate or veneer finishes, more than a dozen edge profiles, and any of our 76 Spectone base finish colors.

**Electric Height Adjustable Manhattan** is a breeze: this finely designed table with its competitive price now features a state-of-the-art electric height adjustment mechanism. Independent silent motors on each leg ensure that the table is self-leveling on uneven floors, and the sensor automatically retracts and stops further table top movement if it identifies an obstacle in the vertical path. The flexible 18" height range from 24" to 42" is controlled with the simple push of a button allowing the user to go effortlessly from seated height to standing in seconds. Available with a rectangular table top only, finishes can be specified in virtually unlimited laminate or veneer options and more than a dozen edge profiles. The base is available in black or silver.

Both Manhattan models are ready to ship September 1, 2016.

Spec, a prominent contract furniture manufacturer, was established in 1991 out of a desire to bring a unique customer-oriented approach to the contract marketplace. The company provides strong designs that excel at meeting all core requirements, together with a huge array of options, choices, price points and scales so Spec customers can specify the best possible solution.
