MAGNUSON GROUP DEBUTS NEW PORT AND NEW WAVE: DESKTOP TOOL RAIL AND WORKSPACE ACCESSORY SYSTEM MAKES DESKTOP ORGANIZATION A SNAP

New Product Introduction: New Port Tool Rail and **New Wave Desktop Accessories** — new-design modular desktop tool rail and workspace accessory system.

Design: New Port — Design Studio Manade
New Wave — Emmanuel Gallina

Manufacturer: Manade of Paris — distributed and marketed throughout North America exclusively by Magnuson Group.

Product Applications: New Port Tool Rail and **New Wave Desktop Accessories** work together and are equally beneficial for use in flexible private, open-plan, “benching” or home-based office spaces. They efficiently keep often-used desktop supplies, accessories, work tools (iPhone, iPads, and the like), documents, folders and binders readily at-hand, meticulously organized, and easily rearranged up and off the desk so as to maintain a clean workable desk space.

Product Description: **New Port** is an innovative, 3-in-1 desk accessory system consisting of a tool rail, mounting options, and optional privacy screens. Three tool rail mounting heights and six toolbar lengths are offered. Optional **New Port** sight divider screens are available in 4 screen materials – acoustic fabric, melamine panels, opaque tempered glass or dry wipe glass for use with dry erase markers. The **New Port** tool rail system can be used in single-sided or double-sided desk and benching environments.

New Wave is a collection of accessories that work in conjunction with the **New Port Tool Rail**. The collection includes:

- One level mail tray
- Two-stack mail tray
- Three-stack mail tray
- Paper boxes
- Pencil cups and trays
- Three section sorters
- Binder supports
- Smartphone stands
- Tablet stands
- Secure box
- Lamp

Construction & Finishes: **New Port Tool Rail** is made of epoxy-coated aluminum, with epoxy coated steel fittings. Tool rails can be mounted at desk-level, or at two different heights above the desktop; with a single sided clamp on the front of the desk; a double-sided clamp for mounting between two desks; or by drilling through the desk.

Uprights are movable on the bottom of the toolbar to position where needed. When mounted between two desks, **New Wave** accessories can be used on both sides of the toolbar. Mounts are the same finish as the toolbar.

New Port screens are 17 3/4" high and are matched to tool rail length and finish.

Tool rails are 2 3/8-inches high by 2-inches deep [? Will check these measurements as well and advise]; lengths available include 21, 31-1/2-; 39-3/8-, 47-1/4-, 55 1/8- and 63-inches. They are available in White, Sand, Silver or Black; covers in White, Blue or Red.
