

# Miraclean®

## Ultrasonic Gun Cleaning System

For **superior accuracy**, you need **superior cleaning**. Ultrasonic cleaners generate microscopic bubbles that penetrate and remove soils from areas that are almost impossible to reach by other means.

The **Miraclean® Ultrasonic Gun Cleaning System** includes **three 6" X 36" X 6" zones** of ultrasonic power: a cleaning zone, a rinsing zone, and a gun oil zone—giving you superior contact and performance in all three critical zones.

As easy as **1 - 2 - 3**: (1) Load the gun components in a basket and immerse in the ultrasonic clean cycle. (2) Move the basket to the ultrasonic rinse cycle. (3) Move the basket to the ultrasonic oil cycle. Miraclean® delivers superior clean in minutes.

Actual test-cleaned part

**Use with MC Gun Cleaner**, a heavy-duty degreaser that is safe on ferrous and nonferrous metals including aluminum and is made to cavitate efficiently in the ultrasonic cleaning tank.
