

FOR IMMEDIATE RELEASE

If you have ever considered producing your own Ammunition Components you need to visit Lou-Jan!

The Ammunition Tooling Specialists

With over 45 years of experience in the Deep Drawn Eyelet industry, Lou-Jan Tool & Die specializes in Ammunition Component contact tooling for transfer presses including US Baird, Waterbury Farrell, Bliss and Platarg.

NEW FOR 2019 - Vertical Swaging Machines. Produce your own precision cores from lead alloy rope. 150 SPM, Variable Speed Control, Easy caliber change over.

It takes Skill & Precision Tooling to create great projectiles. Our Ammunition Component tooling produces some of the most accurate components on the market for manufacturers both large and small.

Prototyping and Sample production of Monolithic or Multi-part Projectiles for development & testing

We also produce Blank & Cup Tooling for all styles of Double Action Presses. Proven and accurate, our tooling produces some of the most consistent cups available.

Complete Rebuilds, Reconditioning or Refurbishment. We can provide you with a Turn Key package ready for production when it hits your floor.

Efficiency is the name of the Game!

What speed are you running your projectile presses?

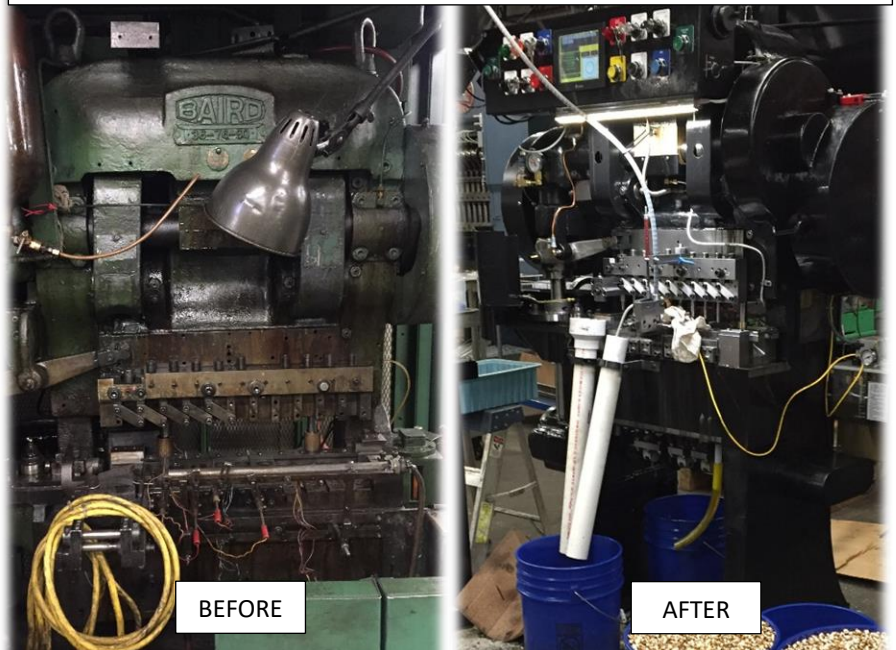

Our Pistol FMJ lines run up to **250 pcs / minute**, Pistol JHP lines up to **150 pcs / minute** and Rifle FMJ lines to **125 pcs / minute**.

Running from strip saves loads of money verses buying cups.

Stagger Feeds save you more than 8% on your raw material.

What can we do for your Bottom Line?

Call Lou-Jan Today!

New, Used, Refurbished or Reconditioned.

Lou-Jan has a large inventory of Transfer Presses available for Projectile or Case manufacturing. We can also source the New or Used equipment for your particular project or handle the Rebuilding or reconditioning of your machines. See a sample of our available machines below.
