Introducing Roth Performance (RCI) *The Shotgun People*

Kaukauna, WI- Roth Performance (Roth Concept Innovations or RCI) designs and manufactures high performance shotguns and accessories. RCI started over 10 years ago with a single product called the XRAIL System. It is a 26 round 12 GA auto indexing shotgun built on a Benelli M2 base. Since then we have designed and manufactured over 100 products for shotguns. In 2018 we changed our DBA name to Roth Performance from RCI and launched our own XB3G QVP Receivers. The XB3G QVP Receivers are replacement receivers for a Benelli M2 or Breda B12i with the port opened for easy loading, a picatinny rail built in for an optic, an LPA style pistol sight groove, a shell latch slot for ethos latch or factory, a threaded latch pin included and a Roth Performance follower included. This is the perfect competition ready Shotgun receiver without having a gunsmith touch your original receiver or if your original receiver got ruined by a Dremel, you no longer need to replace the entire gun! Best of all, All Roth Performance products are 100% MADE IN THE USA.

About Roth Performance: Roth Performance provides shotgun solutions from receivers, high capacity monotubes to accessories like Xtra Shell Caddies, oversized safeties, oversized bolt release buttons, followers, springs and more. We have our own Mark Roth Signature Shotgun built with the XB3G QVP receiver and of course our XM2XI Integrated 26 Round XRAIL System Shotgun. If you need shotgun items, we are the solution. **For more information about Roth Performance, to view their complete line of products, or to order shotgun and accessories** please visit www.RothPerformance.com or by calling 920-585-6534.
