

GWS Tool Group is excited to be exhibiting at the 2020 Shot Show in Las Vegas, Nevada. You can find us at the Supplier Show on January 20th and 21st at booth #51708 to see our latest precision cutting tools.

Come see our latest new featured product, our Clean Shot Series Chamber Reamers. The CS Series Chamber Reamers takes geometry perfected via decades of experience and combines it with the latest in substrate and coating technology and applies it to every custom design we produce for rifle and pistol chamber reamers.

Our Primary & Secondary relief design with cylindrical margin for chatter-free reaming and exceptional finishes. Along with our proprietary design elements, our ultra-fine micrograin carbide with a high degree of transverse rupture strength (TRS) ensures toughness in the most unforgiving of machining environments. Finally an optimized PVD nano-coating ensures wear resistance without edge rounding, to ensure optimal life and surface finish quality.

All CS chamber reamers are made to CIP / SAAMI specifications or custom specifications for standardized cartridges and to the current industry standard for popular wildcat cartridges. Pilots and bushings are optional and available upon request.

We look forward to seeing you there!
