Pulsar Returns to SHOT Show 2020

(MANSFIELD, TEXAS) – Pulsar, the world’s leading thermal imaging brand returns to SHOT Show 2020 at the Sands Expo Convention Center in Las Vegas, Nevada from January 21 to 24, 2020 at booth 11924.

At the largest firearms tradeshow in the world, Pulsar allows attendees to get hands-on experience with premium thermal and digital night vision scopes, binoculars and monoculars that allow hunters and law enforcement to see objects clearly in total darkness.

Experience best-selling products like the pocket-sized handheld Axion thermal monocular, Thermion thermal riflescope, Accolade thermal binoculars and fan-favorite, Trail thermal riflescope.

Learn how thermal is now no longer optional in the field with product demonstrations from knowledgeable staff and meet and visit with famous hunters who swear by Pulsar products by stopping by booth 11924 while attending SHOT Show 2020.

Visit [Facebook](#), [Twitter](#), [Instagram](#) and [YouTube](#) to learn more about Pulsar® products.

About Pulsar

Every Pulsar device is designed, manufactured and tested to ensure demanding professionals receive the most reliable, most advanced thermal and digital night vision performance the industry has to offer. The result of Pulsar’s commitment to industry-leading excellence is consistent world-class quality, precision engineering, seamless device operation and cutting-edge proprietary software. Pulsar produces an array of advanced optical devices designed for law enforcement, security, home defense and hunting applications, including thermal imaging and digital night vision monoculars and riflescopes, night vision binoculars and goggles, rangefinders, IR flashlights and related accessories.
