FOR IMMEDIATE RELEASE

## **CleanShot® Fires Off: First-Ever “Shoot Through” Bore Cleaning Device Unveiled**

*CleanShot makes cleaning the bore of your shotgun as easy as Ready. Aim. Clean.*

MILFORD, MI – Huntego Limited, is excited to announce the launch of its double barreled shot of unprecedented breakthrough for the gun industry. CleanShot; the industry’s first of its kind shoot-through bore cleaning cartridges. CleanShot is efficient, convenient and compared to traditional field cleaning methods, more affordable.

How does CleanShot work?: <https://www.youtube.com/watch?v=U8hLQ98fk64>

CleanShot is a patented high-velocity bore cleaning device that utilizes outward ballistic pressures to power scrub, trap particles and wipe the bore clean. Simply load a CleanShot round in the chamber like any other cartridge, safely fire and your gun is field-cleaned in an instant. Designed to be used in the field or at a range, CleanShot allows shooters to maintain their firearms with minimal cleaning equipment, effort and mess.

Huntego Limited launched the 12-gauge model in late 2017, released 20-gauge in 2018. They are actively working on the 9MM handgun and military grade applications such as the 5.56 model.

The 12-gauge CleanShot uses a standard shotgun hull and is manufactured using the same process and standards as ammunition currently manufactured by the OEM brands today.

The product can be used by a wide range of shooting consumers including: recreational and target shooters, hunters, law enforcement, military, government agencies and more.

CleanShot is currently available in both 12GA and 20GA, and can be purchased at [www.Huntego.com](http://www.Huntego.com).
