

# ETS Group Extends Product Line, Releases ETS 9, 13, 18 & 30 Round Magazines in .45 Cal for Glock® 21, 30, & 41

For Immediate Release

November 6, 2019: The ETS Group is proud to announce the release of their new line of clear polymer pistol magazines in .45 Cal for Glock® 21, 30, & 41. ETS's clear polymer magazines are made from advanced polymers that provide extreme impact resistance so they won't crack or break when dropped. With superior temperature tolerances, these magazines won't become brittle over time, even when exposed to harsh environments, chemicals, or extreme cold. Their durable construction eliminates creep, so the feed lips and body won't spread when being stored long term, even when fully loaded.
