

# ETS Group Extends Product Line, Releases ETS 17, 22, & 30 Round Magazines in 9mm for the Smith & Wesson® M&P®

For Immediate Release

November 6, 2019: The ETS Group is proud to announce the release of their new line of clear polymer pistol magazines in 9mm for the Smith & Wesson® M&P® Shield in 17, 22, and 30 round models. ETS's clear polymer magazines are made from advanced polymers that provide extreme impact resistance so they won't crack or break when dropped. With superior temperature tolerances, these magazines won't become brittle over time, even when exposed to harsh environments, chemicals, or extreme cold. Their durable construction eliminates creep, so the feed lips and body won't spread when being stored long term, even when fully loaded. Plus all of the ETS magazines for the Smith & Wesson® M&P® are compatible with most floor plates that fit Glock® magazines.

## Available in the following models:
