TRIDENT 1
FFL SOFTWARE

FFL Retail POS and eCommerce Software Solution

SAVE TIME & SERVE YOUR CUSTOMERS BETTER

Trident1 is the all-in-one FFL cloud software that replaces multiple systems with one fully integrated solution that also gives you real-time inventory visibility and distributor integration.**

POS SOLUTIONS CREATED TO KEEP YOUR FFL ON TARGET

Founded by industry experts who recognized that FFL retailers were forced to rely on several separate softwares for everyday functions. Until now, the only options lacked in functionality, did not communicate with each other, and were expensive.

STREAMLINE EVERYTHING & NEVER LOSE A SALE

Trident1 provides real-time catalog synchronization with point-and-click order fulfillment, and FastBound's industry leading, ATF-compliant electronic bound book and e4473 that makes acquisition and disposition records easy.

SUPPORTING MERCHANTS. SUPPORTING HEROES.

As an official partner of The Navy SEAL Foundation, and an Executive Sponsor of The SEAL Legacy Foundation, Trident1 is the only software partnered with both of these charitable organizations in today's marketplace. Trident1 also donates ongoing profits to aid in their charitable missions.
