Dear Prospective Client,

I built IMAP in 2003, making a company based on all my Corporate Experiences with the Big 3, Bluewater Plastics, IBM, Motorola, Visteon, ABC Group, Electrolux, Rexnord and ZF-TRW. In addition, my first company GK Engineering, pioneered some of the first 3D printed prototypes in 1998 using a Stratasys FDM-2000.

In 2018 I received my MBA in Global Business, and IMAP uses all the tools available around the world to give you the best combination of engineering, cost and timing for a successful project. Try us today and see how we can benefit you in these areas.

We strive to give you all three: Cost, Quality, and Timing.

Len Koren, Founder and President

128 Tons

Space between Tie Bars 410 x 410mm 16"x 16" Shot Size 222g / 7.8 oz
Bi-Metallic Screw/Barrel

160 Tons

Space between tie bars 460 x 460mm 18"x18" Shot Size 253 Grams 8.9 oz

160 Ton Two-Shot Rotating Platen

space between Tie Bars 805 x 420mm 31" x 16.5" Shot Size 5.4oz 2.6oz 153g / 75g

3D Printing Zero Tooling work cell:

Formlabs Form 2 SLA-Casting, Wax, Dental, Jewelry, Clear, High Temp

9 FDM Printers 200x200x180mm bed size,PLA, ABS, TPU, Nylon, over 300 materials
