Business Days

Carry Inside Your Belt
In Any Position

MADE IN USA

Are you prepared to identify and control threats in low-light environments?

The M6 is the IWB light-bearing holster precisely fit to conceal your exact firearm and laser/light combination. We test with each actual firearm model/gen and light/laser (no blue guns). This allows you comfortably conceal your firearm with a WML (weapon-mounted light/laser) all day long while maintaining the ability to execute a fast and smooth draw.

Details Matter

We are committed to providing an unmatched selection of next-gen open and concealed carry holsters for light-bearing handguns. By leveraging the latest 3D modeling and manufacturing technology, we are in a unique position to continuously innovate our line of precision fit holsters for a wide selection of firearms and light/laser combinations while maintaining some of the shortest lead times in the industry.

Every combination is different – every detail matters to us.

- Reduced Print - Concealment claw (removable) secures pistol grip into your body
- Avoid accidental light/laser activation while firearm is holstered.
- Fine-tune a fast draw with dual retention screws.
- Maintain draw clearance so you can get a full firing grip.
- Protect your firearm from excessive holster wear by reducing drag on the controls and ejection port.
- Conceal all day without excess material or sharp edges to cause unwarranted discomfort.
- Maintain full access to magazine release for administrative reloads.
- Carry everyday for years to come with a holster made from high quality Genuine Kydex 100.
- Ships in 1-2 business days.

*The M6 supports attachments and accessories that can be purchased from Werkz. (Not included) C-hooks for a tuckable holster. Strut straps w/directional snaps. Soft loops w/directional snaps. OWB Mod Kit.
