Supports Compensators,
Slide Mounted Optics,
and Suppressor Height
Sites

MADE IN USA

Are you prepared to identify and control threats in low-light environments?

The M7 is the ideal OWB light-bearing holster for detectives, off-duty officers, or range shooters desiring passive retention (level 1). The M7 is precisely fit to carry your exact firearm and laser/light combination. We test every holster with each actual firearm model/gen and light/laser (no blue guns). Now you can comfortably open or conceal carry your firearm with a WML (weapon-mounted light/laser) all day long while maintaining the ability to execute a fast and smooth draw.

Dual Pattern Design

The M7 is designed with two industry leading mounting patterns to provide you with a wide range of possible mounting and attachment options. These mounting patterns allow you to attach your M7 to a Safariland QLS fork, mount paddle, drop leg platform, Molle webbing, and more. Compatible with Safariland, Blade-Tech, and G-Code (Hangar #39). *The M7 includes a Tek-Lok style attachment.

Details Matter

We are committed to providing an unmatched selection of next-gen open and concealed carry holsters for light-bearing weapons. By leveraging the latest 3D modeling and manufacturing technology, we are in a unique position to continuously innovate our line of precision fit holsters for a wide selection of firearms and light/laser combinations while maintaining some of the shortest lead times in the industry.

Every combination is different — every detail matters to us.

- Avoid accidental light/laser activation while the firearm is holstered.
- Fine-tune a fast draw with dual retention screws.
- Protect your firearm from excessive holster wear by reducing drag on the controls and ejection port.
- Supports firearm customization - Compensators, slide mounted optics (Trijicon RMR), suppressor height sites, threaded barrel drop through.
- Conceal all day without excess material or sharp edges to cause unwarranted discomfort.
- Maintain full access to magazine release for administrative reloads.
- Carry every day for years to come with a rugged holster made from ultra-durable 0.125 Genuine Kydex 100.
- M7 Holster ships in 1-2 business days.

*The M7 includes a Tek-Lok style attachment. Additional attachments and accessories that can be purchased from Werkz, Safariland, Blade-Tech, and G-Code.
