PRODUCT DEVELOPMENT

Whether you are an individual with a new invention or an established company, we offer a vast network of product development services to our customers. Our team is devoted to optimizing the entire process; from design, engineering, and feasibility, to final product launch, we provide quality, cost-effective solutions for outstanding long term relationships. We will get your product where it needs to be.

CAPABILITIES

Engineering	Optimization
Design	Prototyping
Feasibility	Marketing
Moldflow	Packaging

Note

We are willing to step in and help at any stage of the product development process.

PROTOTYPING & 3D PRINTING

Our qualified and experienced 3D printing and prototyping departments work to provide quality, rapidly produced parts through a variety of methods. By using industry-leading additive manufacturing we can provide high-quality 3D printed parts made of the same resin we mold from. We also offer rapid prototype mold building and pull ahead production tooling for high-quality prototype parts with short turn around times.

CAPABILITIES

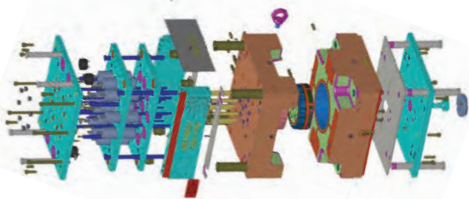

Maximum Print Size	W: 6.06" L: 5.28" H: 9.06"
Standard Resin	GP35 ABS
Other Resin Capabilities	PC-ABS / PC / TPU / Nylon
Support Material	Soluble Armat 21

Note

We work closely with many suppliers capable of printing parts larger than our in house sizing.

TOOLING & MACHINING

Our tooling department is equipped with the experience and knowledge to deliver high quality products. Key services include engineering, part design, feasibility, machining, prototyping, and beyond. We also have strong relationships with many local tool shops, allowing us to reliably source work for unlimited capabilities. If sourcing to a low cost country is preferred, we have shops worldwide to provide diverse price points.

CAPABILITIES

3-Axis CNC Machining	Global Tool Integration
EDM Machining	Tool Preventative Maintenance
Rapid Prototyping	Part Design
Tool Evaluation	Feasibility

Note

For detailed specifications of our equipment, please review our tooling specifications sheet.

INJECTION MOLDING

We go above and beyond with our injection molding services. Our team of highly qualified technicians, process engineers, and tool & die makers provide unparalleled customer service and quality all the while keeping our promise to deliver products on time. We strive to adapt and create custom solutions enabling growth in an evolving industry. Our press size ranges from 66 to 450 tons.

CAPABILITIES

Sampling	Production
DOE (Design of Experiment)	PPAP/Dimensionals
SIM (Scientific Injection Molding)	Insert Molding
Vertical Molding	Overmolding

Note

For detailed specifications of our equipment, please review our molding specifications sheet.

ASSEMBLY & DECORATING

We specialize in creating automated assembly operations both press-side and offline. Our machine operators have experience in manual and automated assembly processes and have been trained to monitor these processes for quality and accuracy. We offer a wide variety of decorating options. **These include, hot foil stamping, ink printing, heat transfer, hydrographic coatings, laser mark technology, and painted finishes.**

PRINTING EQUIPMENT

1 Ton Casco Hot Foil	1 Ton Acromark Hot Foil	2 Ton Franklin Hot Foil	10 Ton AFM Hot Foil	3 Ton Heat Transfer	1 Ton Ink Printer
5" x 3"	6" x 7"	8" x 6"	11" x 6"	8" x 6"	5" x 3"

Note

Some decorating is via trusted suppliers.

MISSION

To produce a quality product and service that will continually exceed our customer's expectations while maintaining a safe and positive work environment.

VISION

Our objective is to enhance our customer's profitability and market growth by providing a quality, cost-effective service to all of our customers from diverse markets. We will accomplish this by providing direct involvement and keen expertise in product design, engineering, tooling, processing, and integration of assembly.

Why PDS?

Our passion for excellence has led to strong customer relationships, quality products, on-time delivery, and competitive pricing.

Our driven and highly qualified team strives to create innovative solutions for our diverse customers of all sizes and industries.

Testimonials

"We have worked with PDS Plastics for several years and we have been impressed by their commitment to ensure customer satisfaction. Their IM process validation have been very detailed. I would highly recommend PDS to anyone looking for processing and part solutions."

Keven Chambers, AO Principal Tooling Engineer, Styker

"PDS has been a trusted supplier for the past decade. Your team is always responsive and helpful for both new and ongoing projects. Your commitments to quality products, on-time delivery and outstanding service keep us coming back with new projects time and again. Thank you for all you do!"

Kerri Courson, Production Manager, Purchasing, Fleetwood Electronics

"Injection molding is outside of our core competencies. Making the decision to outsource was not easy. PDS made what we thought would be a tough task, painless. Their design, tooling and plastics expertise is what makes PDS a great partner. I am excited about the new technologies they have added over the last 2 years. Looking forward to review our next 3D injection molded parts."

Matt Low, Sales Manager, FBN Sales

M-T CHAMBER

LLC

"your first choice in gun safety."

With our Chamber flags that are visible 360 degrees you will know that the gun is 100% unloaded and safe. With our "Mag-well" flags you will know that not only is the chamber empty but there is nothing in the Mag-well.

Our goal is to eliminate the accidental discharge of a firearm. All of our flags are designed and manufactured in the U.S.A.
