PAWS Workholding announces Vise Force® product line of low profile Wedge Clamps

Clio, Mich.... PAWS Workholding has introduced a full line of low profile wedge clamps for workpiece clamping in HMC and VMC machining applications. Vise Force® wedge clamps from PAWS Workholding® are a universal gripping solution capable of working with both automated hydraulic systems or manual hand clamping fixture plates.

Manufactured to expand evenly, the clamps apply balanced holding pressure to the work piece. The low profile, dovetail design improves your machining process by eliminating movement, vibration, and chatter.

The Vise Force clamps have several unique features making them ideal for your manufacturing processes:

- Chip free design (Internal return springs)
- Through hardened (28-32 Rc)
- Clamping forces of up to 14,500 lbs
- Low profile, dovetail jaw design
- Ideal for multiple-part clamping applications
