**UT9S
TACTICAL SUBMACHINE GUNS**

Our rifles are true marvels of modern engineering – they are innovative, last exceptionally long, are highly effective and ergonomic to use.

We have no entry-level rifles – all our rifles are designed and configured for top-level shooting. Our rifles are built on the principle that all but the barrel must be as light as possible, yet durable. Many of the components are made from stainless steel, so this rifle would withstand better marine environment. All aluminum parts have MIL-A-8625 Type III hardcoat anodizing finish to provide high abrasion and corrosion resistance and long lifespan.

TECHNICAL DATA

Barrel length	6", 8", 12", 16"
Barrel Twist	1:10
Caliber	9 x 19 NATO
Overall Length (min/max)	720 / 810 mm with 12" barrel
Weight (w/o optics)	88.1 oz – 2500 gr
Stock type	Adjustable, with 7 positions
Handguard	Free floating with MIL-STD M1913 Picatinny Accessory Rail
Operation	Blowback, Closed bolt
Forward Assist	No
Trigger Weight	1.5 – 2.2 kg
Fire Selector	Safe, Semi-Automatic, Full-Automatic
Sling Attachment Points	QD on both sides of the stock
Muzzle Velocity (approx. With 9mm NATO ammunition)	420 m/s
Rate of Fire	Approximately 900-1000 RPM
Accuracy	2 MOA @ 25m 3 MOA @ 50m 5 MOA @ 100m 15 MOA @ 300m
Barrel Life	20 000 rounds minimum
Parts Life	15 000 rounds minimum
Other	Stainless steel small parts, improved low mass bolt, long-life springs
Silencer	Optional
