

January 8, 2020: HIPERFIRE Announces The PDI™ Trigger Family. HIPERFIRE's customer base has clamored for an AR drop-in trigger that features the “feel” and hard-hitting hammers its triggers are known for. Most aftermarket drop-ins are notorious for LPS, light primer strikes. To get the pull weight down, designers have compromised their hammer fall. Not so with the new PDI line of triggers. These drop-ins pull at around 2 lbs. and sport HIPERFIRE's unique HIPERSHOE that now mounts onto a curved bow,

not just straight. The hammer strikes surpass SAAMI's copper crusher spec and hit harder than MIL-spec M4/16 hammers. Wow! The pull? It's single stage. It's short, sweet, and smooth as butter. The "feel" is almost transparent to the shooter. To top it all off, no PCC blowback violence can touch it. The four PDI versions feature a hammer collision bumper. Its disconnecter and disconnecter spring are impact and crush protected. Is it just for PCC? No way. It's just an excellent trigger. Anyone can appreciate it shooting slow, fast, short-range, or for long-range precision, and on the move, it surpasses SAAMI's rough handling specification. Be the first to shoot it at Industry Day at the Range, the day before Shot Show 2020 at HIPERFIRE's full-auto lane. See it, feel it, at HIPERFIRE's Shot Show 2020 booth #3016.
