Gunship Helicopters to Debut the M-134 Minigun to its Aerial Shooting Arsenal

Once-in-a-lifetime bucket list experience available only in Las Vegas January 2020

Las Vegas, Nevada – Las Vegas-based attraction Gunship Helicopters announces it will add to its arsenal, the M-134 Minigun. The M-134 fires over 4,000 rounds per minute. The M-134 Minigun is a 7.62 NATO six-barrel rotary machine gun, with a high, sustained rate of fire. It features a Gatling-style rotating barrel assembly with an external power source.

“Gunship Helicopters continues to offer unique, one-of-a-kind experiences by offering its newest product the Door Gunner experience with the Minigun. This marks the first time in the United States that a Minigun has been made available to experience from a helicopter, recreationally,” says Casey Pursell, Director of Sales and Marketing.

Guests must complete an orientation, mission briefing and simulation before getting on the helicopter. Additionally, there is an air range safety officer on the flight, who loads the gun, directs the passengers in its firing and is responsible for its operation. The Minigun is attached to a gun mount on the outside of the helicopter. The doors are open so the person shooting can sit inside and be belted in while shooting at steel targets and wreckage hundreds of yards away.

In addition to the newly added Minigun, Gunship Helicopters features both aerial and ground shooting experiences, including the M249 SAW, Barrett .50 caliber, APC M-2, main battle tank and more. Visitors can choose between packages based on their individual preferences.

Gunship Helicopters staff and range are also available for general utility training and content creation and group outings. Services include team building, custom videos, law enforcement and scenario-based training, small arms familiarization training and defense contractor testing to name a few.

About Gunship Helicopters

Gunship Helicopters is the only place in Las Vegas where you can shoot a machine gun from a helicopter. The 71-acre private range is located in the Mojave Desert just outside of Las Vegas in Sandy Valley, Nevada. Founded in 2015, Gunship Helicopters is privately owned by Robert Fahnestock, Matthew Fahnestock and Randy Saenz. For more information visit www.gunshiphelicopters.com.
