

Machine-Ready Blanks from TCI Precision Metals at Shot Show Supplier Showcase, Booth 51437

Reduce Setup Time, Improve Production Throughput, Reduce Scrap

January 20, 2020, Las Vegas, NE

TCI Precision Metals will be showing its precision Machine-Ready Blanks capabilities to sporting and shooting industry manufacturers at the Shot Show 2020, Las Vegas, NE, January 2--21, Palazzo Ballroom, 5th Floor Venetian Hotel Meeting Rooms, booth 51437.

“Machine-Ready Blanks from TCI Precision Metals helps manufacturers increase throughput up to 25% allowing them to ship finished parts fast and get paid quicker,” said Ben Belzer, President. With a single purchase order customers receive custom precision blanks ready to load directly into their CNC machining centers. Precision blanks eliminate the need for in-house sawing, grinding, flattening, squaring operations and outside processing. Each blank arrives deburred, clean and to customer specifications – guaranteed as close as +/- .0005” dimensionally and as close as .0002” flatness, squareness, and parallelism. “Customers can use the time they previously spent in setup and prep for more productive use of CNC machining centers, adding to their bottom-line profitability. And with our ability to consistently produce close tolerance, flat blanks, part movement is reduced, improving overall quality, added Belzer.”

Founded in 1956, TCI Precision Metals is a family-owned precision manufacturer producing precision Machine-Ready Blanks from aluminum, stainless steel and other alloys. Sawing, Grinding, Milling and Finishing operations with the added benefit of being a plate and sheet distributor make TCI Precision Metals a one stop source for quality aluminum, stainless and other alloy blanks. TCI Precision Metals offers customers rough CNC milling and turning services
