

Tardigrade Industries is proud to introduce the OCELLUS line of Armored Eyewear - The World's First TRUE Ballistic Eyewear. Among the many cutting edge features for this ground breaking technology for our warfighters and peacekeepers are:

- Proprietary lensing -- Designed to defeat the threats in theater and on the streets, while giving crystal-clear performance to allow the visual acuity our soldiers need to accomplish their mission.
- Scratch proof -- The same technology that enables the lenses to match high velocity fragmentation and bullets, also offers a scratch resistance surface. No more scratched eyewear from the rugged terrain and elements.
- Fog resistant -- The OCELLUS utilizes state-of-the-art fog protection that will assure clear eyesight in the most humid conditions.
- Lightweight strength -- This remarkable product also is incredibly lightweight. For protection nearly triple that of current eyewear fielded by the armed forces, it comes in at a scant 5 ounces.
- Independently third-party tested and validated to meet and vastly exceed current eyewear specifications. Even meeting a STANAG body armor rating for fragmentation.
- Fully scalable armor system that achieves the ballistic protection levels seen in today's helmet systems. That's right, true full head protection is finally here.

TARDIGRADE INDUSTRIES

STRAP RETAINER
PROPRIETARY STRAP DESIGN AND RETENTION SYSTEM.

FOAM GASKET
FOAM GASKET SEALS UNIT TO THE FACE FOR COMFORT, SHIELDING DIRT AND DEBRIS.

ANTI-FOG LENS
INNER LENS IS COATED DURING MANUFACTURING TO PROVIDE MAXIMUM ANTI-FOG PROPERTIES.

THERMOPLASTIC COVER
DROP PROTECTION SEALS THE LENS SYSTEM IN PLACE.

OCELLUS™
THE FIRST TRUE BALLISTIC EYEWEAR SYSTEM, CAPABLE OF DEFEATING AN ARMORED RATED SIMULATED PROJECTILE (FSP) IN ACCORDANCE WITH STANAG 2920 TO 1877 FPS.
ATTACHMENT OPTIONS INCLUDE A PROPRIETARY STAND ALONE HEAD STRAP OR PAIRED TO AN ACH HELMET RAIL.
PROTECTION EVERY WARRIOR DESERVES

BALLISTICS

ANSI	150 FPS
MIL-PRF	650 FPS
OCELLUS	1877 FPS
ACH HELMET	2400 FPS

PERIPHERALS
DESIGN DRAMATICALLY ENHANCES PERIPHERAL VISION WITHOUT COMPROMISING PROTECTION.

ANTI-SCRATCH LENS
THE FRONT LENS IS IMPERVIOUS TO SCRATCHES. THE ONLY SUBSTANCE KNOWN TO SCRATCH THE LENS IS A DIAMOND.

WIDTH 14.45 CM
HEIGHT 5.1 CM
WEIGHT 4.9 OZ.
