FOR IMMEDIATE RELEASE

EXPANSION AMMUNITION SET TO PRODUCE 12.7 X 108MM STEEL CASED NON STANDARD AMMUNITION IN THE UNITED STATES IN 2020

December 13, 2020 Dallas Texas.

Over the last 3 years Expansion Ammunition has been approached by the D.O.D. (Department of Defense), USSOCOM (United States Special Operations Command), U.S. based defense contractors, and U.S. friendly Allies to produce non-standard ammunition, specifically 12.7x108mm Russian for training and defense. After 2 years of research and development Expansion Ammunition is pleased to announce at SHOTSHOW2020 that we have launched production of a U.S. produced 12.7 x 108mm steel cased cartridge. We are currently taking orders for precision ball ammunition for initial production. AP (Armor Piercing), API (Armor Piercing Incendiary), APIT (Armor Piercing Incendiary Tracer), and T (Tracer) rounds will be available for sale 2nd quarter of 2020.

In addition to 12.7 x 108mm ammunition we are also in the process of setting up production lines for U.S. produced steel cased 14.5 x 114mm, 7.62 x 54R, and 7.62 x 39 set to begin limited production by 3rd Quarter of 2020.

For more information or to place an order for non-standard ammunition for government or foreign military sales, please contact our sales director via email at lucas@expansion-ammunition.com or leave a message at our sales office 469-480-7177 ext. 21.

Expansion Ammunition is a Texas based ammunition supplier that has been in business since 2013. Expansion Ammunition provides standard and non-standard ammunition solutions for military, law enforcement, and civilian shooting needs.
