

INTRODUCING ENDOSNAKE

World's Smallest Smartphone Borescope

|| About Us

Started by a small passionate group of army veterans and first responders, EndoSnake was first brought to the gun community in 2017 with one simple premise: everyone deserves to be safe.

It makes our day, when we get messages from people who thank our products for saving them from harm or from getting ripped off.

Today we have a range of products created using feedback from our customers, for a variety of applications: home, garage or gun range – we got it covered.

Firearms Inspection

Home Inspection

Vehicle Inspection

New Uses Every Day

ENDOSNAKE

3.9MM BORESCOPE CAMERA

User Testimonials

Whilst we are not perfect and working hard on becoming better, this type of customer feedback is fuel for our fire.

Jeffrey Lee Smith Not just guns, but sinks, garbage disposals.... changing the low beam bulbs on a subaru(have to go though the wheel well And normally done by feel alone, and hard to seat correctly.) an endoscope allows you to actually see what your doing in real time. ... can even inspect that sore throat you came down with. Or ear canal. Or inside walls, vents.

Author

Endosnake Thank you so much, glad to be of use!

Jeff Smith I bought one a while back. Have used it quite a few times especially on rifle barrels. One of the best bits of kit I have purchased. And I'm not a gunsmith. Well worth the money.
