

Electric Fire

REMOTE IGNITION SYSTEM

The Superior Signal Electric Fire - Remote Ignition System (EFS-RIS) is a wireless programmable firing system designed to initiate Smoke Grenades on command from long distances. The Remote Ignition System is ideal for training exercises, scenarios, and simulations where instantaneous smoke is needed in multiple locations or in intervals, at the push of a button!

The EFS-RIS features a 600+ foot range and individual Field Module (Receiver) control from one compact Remote. The EFS-RIS comes in an incredibly rugged, waterproof, and airtight hard case built to withstand the most extreme conditions. The hard case features easily customizable pick-n-pluck style foam and is large enough to add additional Field Modules or Smoke Grenades.
