

**\*\*FOR IMMEDIATE RELEASE\*\***

LEHI UT, January 15th, 2020 –Scope Slicker NX2 is the result of several years of product evolution. Developed by Alpine Innovations, Scope Slicker NX2 is made with 2mm neoprene and a patented method which keeps the cover positioned on top of the scope preventing loss and improving ease of use.

ScopeSlicker NX2 features an improved contour fit design with protective objective lens insert for added lens protection. The eyepiece end includes a premium microfiber cloth sewn inside a small interior pocket. The microfiber cloth is sewn with a finger pocket which makes it easier to remove smudges from lenses. The hem of the NX2 is sewn with elastic inside which allows it to stretch and fit a wider range of scopes. Scope Slicker NX2 is offered in 2 sizes that fit most scopes on the market. Size medium fits 12”- 17” long scopes up to 65 mm Obj. and size large fits 14”-20” long scopes up to 65 mm objective lenses with large turrets.

“After reviewing many scope covers on the market,” says Darren Jones, CEO and developer of Alpine’s products. “I knew we could make a scope cover for elite hunters who want premium protection for their optics, that’s what led us to develop the NX2 Scope Slicker.”

Scope Slicker NX2 retails at \$29.99 and is offered in a variety of Vanish Camo patterns. See the new Scope Slicker NX2 this fall at many major outdoor retailers.
