

****FOR IMMEDIATE RELEASE****

LEHI UT, January 15th, 2020 –Ammo Wallet keeps rifle cartridges secure and protected from the elements while providing quick access when needed. Developed by Alpine Innovations, this ammo holder completely covers ammo and is comfortable to wear. By facing two layers of non-slip neoprene panels together, Ammo Wallet presents a gripping surface area that holds to belts straps or slings. These two layers are sewn with hook and loop fasteners at the bottom edge, making it easy to place on belts, slings or closed loop straps.

Built to withstand the rigors of aggressive hunts, Ammo Wallet will save you money over time by preventing unwanted ammo loss or damage. The patented base pocket eliminates ammo from sliding through the elastic loops to the ground.

Ammo Wallet is offered in 2 models and several modern camo patterns. The small caliber size fits 10 rounds (.223 - .243 casings) and the large caliber size fits 7 rounds (.270- .338 casings) respectively.

“Developing better outdoor products is my passion,” says Darren Jones, CEO of Alpine’s products. “Ammo Wallet is not only a quality built product but one that will pay for itself over time.”

Ammo Wallet retails at \$21.99 and is offered in several Vanish Camo patterns. See the new Ammo Wallet this fall at many major outdoor retailers.
