Wrench Slot**

## SD5 Rescue Multi-Tool

*Designed by Louis Krudo of KRUDO Knives*

It isn't often that you need a seatbelt cutter or a glass breaker, but when you do, *you know the \$h!t has hit the fan!*

Introducing, the SD5 Rescue Multi-Tool designed by Louis Krudo. Not only is this designed with first responders, EMS, LEO, Firefighters and any other professional in mind that is out there working for public safety, SD5 is also designed with civilians in mind. It is the tool that pros and non-pros alike will find useful, if not down-right mandatory to have at the ready.

SD5's curved design fits ergonomically in the hand while the index ring offers stability and leverage. With a pocket clip for ambidextrous carry, SD5 is an easy draw to quickly help alleviate any rescue situation. From opening an O2 valve to breaking glass or unscrewing a phillips or flat head, or, if necessary, as compliance tool, SD5 is a multifunctional seatbelt cutter.
