

MICRO MUZZLE BRAKE WEIGHS ONLY 25 GRAMS!

LongShot Mfg has just released their new MINI-BRAKE, a micro sized muzzle brake weighing just 25 grams in the Stainless Steel version. These brakes are also available in their aggressively toothed VIPER version, designed for defensive up-close encounters or to be used as a body prod/standoff.

The MINI-BRAKES are CNC machined from solid bar stock and are available in choice of Solid Brass, Anodized Aluminum and Grade 303 Stainless Steel. Currently produced for ½-28TPI, ½-20TPI, ½-36TPI, 578-28TPI, with additional firearm specific thread sizes being added on a continuous basis.

All LongShot products are designed and produced 100% in the USA in their own facility in New Jersey. The company stands behind their products by offering lifetime replacement warranty on everything they make.

For more information on LongShot products or to purchase, you can visit their booth #230 and website at www.longshotmanufacturing.com.
