Nightstick Launches LGL-Series Dedicated Long-Gun Lighting Kits

New high-performance weapon lights for rifles, carbines, and shotguns with MIL-STD-1913 rails

Wylie, Texas – October 2020 - Nightstick, a global manufacturer of innovative, professional lighting products introduced their new series of dedicated long gun weapon lights with [LGL-150](#), [LGL-160](#), and [LGL-170](#) models. These new high-power long-gun lighting options represent the pinnacle of performance in close combat/defense illumination technology for rifles, carbines, and shotguns with MIL-STD-1913 (Picatinny) rails.

Model LGL-150 features a compact body running on a single CR123 battery producing 450-lumens of crisp downrange lighting for two hours, illuminating objects and threats up to 220 meters (721 feet) away. Weighing in at only 4.2 ounces and made of 6061-T6 aluminum with a black hard-anodized satin finish, the LGL-150 is IP-X7 rated waterproof. Sharing the same rugged construction and waterproof rating, the LGL-160 Full-Size Long Gun Light Kit more than doubles the output to 1,100 lumens and 22,541 candela. With a longer 300-meter beam from two included CR123 batteries, the LGL-160 provides powerful downrange light for two hours. The all-in Nightstick LGL-170 Rechargeable Long Gun Light Kit generates a daylight-like whopping 1,500 lumens and 23,148 candela for an hour and a half and boasts a 304-meter beam distance. The fully equipped LGL-170 model comes with two 18650 li-ion batteries and a USB charger for hot-swapping convenience, with the multi-fuel flexibility to run optionally on two CR123 batteries.

“Our LGL Series is engineered to be as flexible as they are powerful, giving both law enforcement and gun owners alike multiple mounting and activation options up to a segment-leading 1,500 lumens,” says Russell Hoppe, Director of Marketing. “We designed these LGL-Series kits for both tactical and self-defense situations where intuitive activation and reliable performance are paramount.”

Each weapon light kit includes both a standard and 45-degree offset rail mount with thumbscrews, tail cap, and 6-inch remote pressure switches, RPS rail mount, and Nightstick's own proprietary NS-WM1 wire-management clamp to eliminate snags. To learn more, please visit www.nightstick.com.
