

TRIGGERTECH

Two-Stage Triggers - Redefined

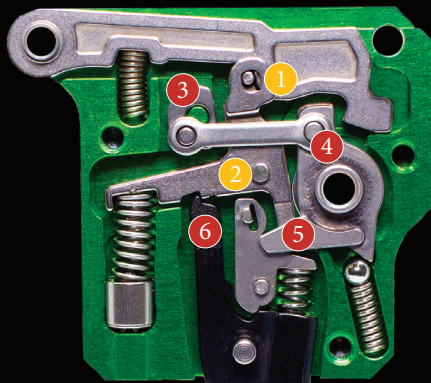

TriggerTech Two-Stage Triggers

Developed with the same unmatched zero-creep break, tactile pull weight adjustment (on both stages), rugged design, and no compromise engineering. Our focus on safety led us to develop the first Rem 700 trigger with four points of safety. This is a new level of performance and safety for those who prefer some movement before the wall.

TriggerTech Technology

ZERO CREEP

FOUR POINT SAFETY

ADJUSTABLE

- 1 Zero Creep Technology™ - patented, free-floating roller between the sear and the ticker.
- 2 Ticker Technology™ - minimizes over travel and sets you up for the perfect reset.
- 3 Ticker Blocker - prevents the ticker from moving while on SAFE.
- 4 Sear Blocker - prevents the sear from dropping while on SAFE.
- 5 First-Stage Lockout - the tumbler locks out the first-stage while on SAFE.
- 6 First-Stage Safety - even when on FIRE the first-stage safety blocks the ticker before the first stage is actuated.
- 7 Tactile First-Stage Pull Weight Adjustment
5/64 Allen key
- 8 Tactile Second-Stage Pull Weight Adjustment
5/64 Allen key

Production pull weights subject to change
