

## R.E.A.L - Recoil Enabled Airsoft Laser

As the industry leader of laser based dryfire training, Laser Ammo has satisfied thousands of shooters with their SureStrike™ laser cartridges. While ideal for first shot scenarios (such as drawing from a holster, marksmanship training, etc.) we wanted to provide a solution for those who wished to have a solution for multiple follow up shots, without having to rack the slide in between each shot (as with customers using striker fired pistols). The solution must be budget friendly, unlike the current solutions available to mainly just the military and various law enforcement departments.

Laser Ammo thus developed the R.E.A.L - Recoil Enabled Airsoft Laser (R.E.A.L.) : a replacement drop in barrel that converts popular airsoft model training guns, together with a vibration activated SureStrike™ cartridge (in either red or IR) into a laser emitting full blowback training pistol to simulate a real firearm. This opened a new era of at-home training with recoil that allows tactical training, fast transitions and dynamic movement when training with the Smokeless Range® or i-MTTS targets.

Laser Ammo is offering the full training gun with the R.E.A.L barrel and laser, or just the R.E.A.L kit that includes the barrel and the laser (in red or IR).

### Product advantages:

- Realistic look and feel of the shooters personal firearm
- Full recoil training
- Safe – cannot shoot any projectiles
- Fits in most holsters available on the market
- Can train on: speed drills, reloads, marksmanship, transitional drills and many more.

Conversation barrel and Vibration laser	SKU	MSRP
KWA ATP LE with Red /IR Vibration Activated SureStrike™	REALKIT/REALKIT-IR	\$245/\$265
