

MOHOC[®]
THE TACTICAL CAMERA

STANDARD BODY CAMS ARE FINE FOR PATROL, BUT THAT'S NOT HOW YOU OPERATE.

Tactical operations are intense and dynamic. A chest-mounted camera records only a confusing, obstructed point-of-view. Designed for elite units, MOHOC[®] Cameras are low profile, helmet contoured, and snag free to capture the operator's true perspective.

You're a tactical professional. Eliminate doubt and defeat false accusations with a clear shot from MOHOC[®], the Tactical Camera.

To learn more about our Departmental T&E Program, contact MOHOC or your local tactical equipment dealer.
